Education

Maturi Venkata Subba Rao Engineering College

Expected May 2026

Bachelor of Technology in Information Technology (GPA: 8 / 10)

Hyderabad, Telangana

- **Relevant Coursework:** Data Structures and Algorithms, Python, Compiler Design, Operating system, Database Management Systems

Experience

Android Developer Intern (Virtual)

June 2024

Google for Developers - Supported by India Edu Programs

Hyderabad, Telangana

- Developed and optimized Android applications, focusing on user experience and performance.
- Implemented key Android components such as **Activities, Fragments, RecyclerView, and APIs**.
- Enhanced app security and efficiency through robust coding practices.
- **Certificate ID:** 4c32c3beb6285ea9cea04e61c924a5e0

Intern - Communication using MIL 1553 BUS

April 2024 - May 2024

RCI - DRDO

Hyderabad, Telangana

- Completed an internship at **Research Centre Imarat (RCI-DRDO)** under the **Directorate of Software Development Center**.
- Gained hands-on experience in **MIL-STD-1553 communication protocols** used in defense applications.
- Worked on data transmission and integration techniques for secure military communication systems.

Projects

BloodDonation | HTML, CSS, JavaScript, Java, Android Studio

- Developed a web-based application to streamline the blood donation process by connecting donors with local hospitals and blood banks. The project features an intuitive user interface, real-time donor availability, and secure data handling to improve both accessibility and efficiency in the donation process.
- Designed and implemented both front-end and back-end components using modern web technologies.
- Crafted a responsive and user-friendly interface to ensure seamless interaction across devices.
- Integrated robust data validation and security measures to protect donor information.

Real-Time Face Detection using OpenCV | Python, OpenCV, Computer Vision

- Developed a real-time face detection system using **OpenCV** and **Haar Cascade Classifier** to identify and track faces in live video feeds.
- Implemented **image preprocessing techniques** to enhance detection accuracy and reduce false positives.
- Optimized detection performance by fine-tuning **scale factor, min neighbors, and bounding box parameters**.
- Utilized **cv2, NumPy, and OpenCV** to handle image processing and visualization.
- Designed a user-friendly interface that enables real-time monitoring using **webcam integration**.

Technical Skills

Programming Languages: C, C++, Python, Java

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL

Tools & Platforms: Android Studio, Git

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming
