Education

University of Central Missouri

Expected May 2025

Master of Science in Computer Science

Lee's Summit, Missouri

- **Relevant Coursework:** Advanced Algorithms, Advanced Database Systems, Advanced Web Applications and Service Development, Artificial intelligence, Statistical Foundation

Vignan Institute of Technology and Science

July 2022

Bachelor of Technology in Computer Science

Hyderabad, India

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Compiler Design, Database Management Systems, Computer Networks, Cloud Computing

Technical Skills

Languages: PHP, JavaScript, Python, C++, SQL, Java

Web development: React.js, Node.js, Express.js, HTML, CSS, jQuery

Databases: MongoDB, MySQL **APIs/Integrations:** Stripe API, Spotify API, ServiceNow **DevOps/Cloud:** Docker, Heroku, Netlify

Experience

Software Engineer

March 2022 – July 2023

Accenture

Bangalore, Karnataka

- Implemented ServiceNow solutions for clients, improving user satisfaction by 15%, measured through feedback surveys from 100+ users.
- Set up modules in ServiceNow like Incident Management and Asset Management, leading to a 20% reduction in defects within 3 months.
- Developed custom scripts using JavaScript, optimizing workflows and improving platform performance by 20%, reducing average ticket resolution time from 6 hours to 4 hours.
- Configured ServiceNow instances for 5+ enterprise clients, creating tailored solutions that enhanced efficiency by 15%.
- Collaborated with cross-functional teams to gather requirements and deploy ServiceNow solutions, improving communication and project delivery.

Projects

HealX - Doctor Appointment Booking WebApp | PHP, MySQL, HTML, CSS, JavaScript

- Developed an appointment scheduling system for doctors and patients, supporting 3 user roles and handling 50+ appointments per day.
- Integrated a payment gateway that processed 100+ payments monthly, ensuring secure transactions for users.
- Worked on key pages including Index.php, Register.php, and ScheduleAppointment.php, ensuring smooth functionality for both patients and doctors.
- Collaborated on database architecture and user login functionalities using pdo.php for database connections.

Spotify Clone | React, Node.js, MongoDB, Spotify API, JWT, Docker

- Built a full-stack music streaming app with Spotify API integration, enabling track playback, playlist creation, and search functionality for 200+ users.
- Developed user authentication with JWT, managing secure access for over 100 users across 20 playlists.
- Utilized Docker for containerization, reducing deployment time by 20% and handling 50 concurrent users smoothly.

E-Commerce Store | React, Node.js, Express, MongoDB, JWT, Stripe API, Docker

- Developed a RESTful API that managed 500+ products, 100+ users, and 200+ orders in the database.
- Implemented role-based access control, securing admin and user actions for 5 different roles (Admin, User, Guest, etc.).
- Integrated Stripe API, processing payments for 100+ orders monthly.
